

## Card take combos

After taking all the cards that need to be removed, cards that end up floating all “drop” to the bottom.  
After dropping, if the cards line up to be adjacent to the same animal or color, those cards must also be taken.

This continues until all cards have settled.

Make sure to take all cards that need to be taken before “dropping” the floating cards.

## Tsundaru

Players: 2 to 6   Play time: 10min   Ages: 10 and up

In this game you try to stack cards without having to take any.  
If you have to take cards 2 times then you are out of the game, the player with the fewest cards taken at the end is the winner.  
However if a player manages to take more than 15 cards, they also win.

## Contents

- Cards…45 (3 animals x 3 colors x 5 sets)

Snake

Cat

Bird

## Preparation

Shuffle all cards face down.

Place 4 cards face down in a row, these will be the base for the game.

You will need 10 cards for per player in the main pile. Put any remaining cards back in the box.

Deal 2 cards to each player, do not show your cards.

Decide who goes first and start the game.

## How to play

### Basic rule

Each player takes a turn in clockwise.

- 1 : Place 1 card on the field.
- 2 : If the card you placed is adjacent to a same animal or same color card, you must take all corresponding cards.
- 3 : Place the taken cards in front of you so it is clear how many you have taken.
- 4 : If it is the second time you have taken cards, you lose the game.  
If you are the last remaining player, you win.
- 5 : Redraw a card then it's the next player's turn.

### Ending of the game

**A:** Once the main pile is empty, do not reshuffle the cards.

When all cards are played, the game is over.

**B:** Although uncommon, if all 4 rows get 5 cards stacked, the game is over.

The player with the fewest taken cards wins (if there are ties, both players win)

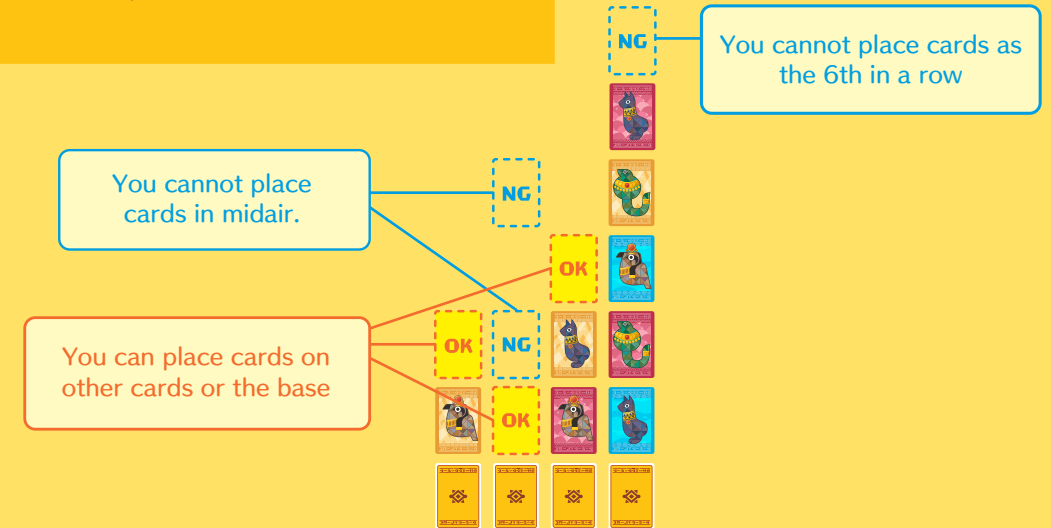

### Special win

If you take more than 15 cards, you win (not including your hand)

You win even if you take 15 cards in one round.

## Placement rules

- 1 : Cards must be stacked on each other starting with the base cards.
- 2 : You must place cards on top of each other, cards cannot float.
- 3 : There can only be a max of 5 cards on each base.

## Card taking rules

If you place a card adjacent to the same animal or color then all corresponding cards must be taken.
